

Your crop on that northwest quarter sure looked good, Bob.

Fertilizer did it, Jim... I figure I got an extra \$1,200\* clear profit from that quarter

\*Based on average yearly yield increase, based at 2.5%.

Bob's extra profit was just one of the many "bonuses" farmers get from fertilizing. When you fertilize your crops you have up to two weeks earlier growing root, half as much damage. Better grades, bigger yields, additional control and keeping your land fertile are additional advantages—reasons why more and more farmers are fertilizing every year. See your Elephant Brand agent about the right fertilizer for you.

R.R. 1, White Rock, B.C.

We have experienced since the end of the war."

Professor Barber, chief of professional asphaltum, is refreshing. Unfortunately his view on Canada's economic prospects appear to be influenced by a desire to keep the taxpayers' money for what he describes is "a long range programme of economic research." He is particularly distressed because no major research is being done in "the relationship between population growth and the demand for capital."

It is unfortunate that the Minister of Finance, Mr. Bennett, is so naive enough to suppose that the availability of capital is the important factor in maintaining progress and prosperity. Far more important, surely, to concentrate on the national and political as well as economic, which make risk-taking, and investment, which Professor Barber rightly regards as essential to property and growth, worth while.

Progress depends on many things—among which are immigration policy, trade policy, supply and demand on world markets, taxation, and other matters.
